nis death was not a surprise, yet it caused genuine sorrow.

Professor Jones was a native of Ireland. He was educated at the University of Dublin, where he distinguished himself in all his atudies—particularly by the classics, and is said to have won every Latin and Greek prize open to him. After leaving the university he went to London and taught there for a short time. Then and taught there for a short time. Then he came to America. In 1852 he became a Professor in Jefferson College, where he remained until the union of Washington and Jefferson. He was offered and accepted a chair in the new institution, and he remained connected with it until his death. Upon his retirement from active college work in 1878, he endowed four prizes—two in Latin and Greek and two in chemistry.

Prof. Jones was somewhat eccentric and he never told anyone of his early life. The date of his birth and the year of his graduation from the university are unknown even to his fellow professors with whom he has been intimately associated for a third of a century.

whom he has been intimately associated for a third of a century. His attainments were wonderful. He could repeat from memory the whole of Virgil and Homer. It is said that formerly when he conducted the religious exercises fif the college chapel. he would read from the original Greek, gracefully translating at sight. In chemistry, too, his inventive genus and skill rendered all his experiments eminently successful. His bright and polished wit, his pleasant and affable manner, and his erudite learning made him loved and respected by his students, all of whom are now alumni. Through respect for Prof. Jones' memory Through respect for Prof. Jones' memor pended, the literary societies adjourned and the Olympic contest of the Junior and Sophomore classes was postponed until Tuesday.

of what would likely result from it. Both sides, as usual, were reticent regarding the plans of the committee. The meeting was held with closed doors.

From what could be learned it would seem that the scale, as presented, will not be acceptable to the manufacturers. One of them, speaking about it to-day, said that the scale was not a reduction from the one now in force, with the exception of one kind of work, where it was an 8 percent reduction from the present price. "The new scale will not be accepted," said he, "and I don't think very much will be accomplished by the meeting this alternoon."

The conference of the iron manufacturers and workmen adjourned to-night at 11 o'clock to meet again to-morrow, no definite conclusion having been reached. The session to-day lasted nearly eight hours, and is said to have been very harmonious. It is expected that to-morrow's meeting will result in a satisfactory settlement of all differences.

Odes and ballads, romances dramas, etc., flowed from his prolific pen Shortly before the revolution of 150 a literary revolution took place, at the head of which was Hugo. A band of young men, imaginative, ardent and confident, sought to renovate French literature by departing from classic rules and models, substituting a varied and very irregular verse for the monotonous Alexandrines of the old school, and making art precisely conform to nature, which they carried so far as even to bring into prominence things

pleased with and teaches us to keep out of sight. The new school, "La Jeune France," as they called themselves, formed the romanticists, and their opponents, the classicists. The literary war lasted several years. Hugo's drama of "Marion De'orme" was received with eathnesses and he added to his reputation by the publication of "Feuilles d'Antoine."

In 1832 the ministry suspended one of his dramas, "Le Roi s'Amuse," but his popularity coutinued to increase, and in 1837 Louis Phillips made him an officer of the Legion of Honor, and in 1845 a peer of France. A Bloody Crime in the Northwest in 1870 on the Subject, but Nothing Tangible Obtained from Him-Is Riel Guilty?

CHICAGO, ILLE, May 22 .- An article wa published here yesterday giving a detailed account of the horrible death in 1870 of Thos. Scott, at the direct instance, if not break out into cries and lamentations. They had stayed with the body since its removal to the rooms yesterday. At midning the last night, they were persuaded to go home, though they did so unwillingly. The two girls, of 23 and 15 years, are heartbroken over the death of their brother. "Poor Franz." is aid the younger one, Barbara, this morning, "if we enly had money enough to bury him as we would like. Six weeks ago we sent him every cent we could get to bring him here. We have nothing left."

Michael Leppig, the father of the little girl, whose death formed the other part of the double tragedy, was at the undertaking rooms this morning while the two girls were there. He seemingly took as much interest in the dead boy as if he was his own son. "I don't know what to think of that boy there," he said as he pointed to the body of Franz, "it may have been accidental, but I can't believe it, somehow or other. It may have been done purposely, and I am sure I don't know why he should have done it. But it's all over now."

The bodies of both the victims were buried this afternoon. One is well-known to New York play-goers as the blind girl in "Young Mrs. Winthrop," which was played at the Madison Square Theater. The dead girl said that she had been ill for more than two mouths, and had last played in New-Jersey. She will be buried to-morrow by the actors' fund, unless friends claim the body.

JOLIET, ILL, May 22.—Charles Angell

Much excitement has been made by reports recently published on the vite condition of the slums of London. In one cellar was found a family consisting of a man sick with the small-pox, his dying wife, three half-naked and dirty children, and one pig. In some parts there is one gin-smill to every hundred persons. What defilement! Yet corresponding impurities often defile the human blood. They can be cast out by Brown's Iron Bitters, the great strengthener and purifier. Mr. B. J. Strange, of Stark Lake, Piorida, says, "Brown's Iron Bitters is the best blood punifier I ever tried. It gives all the satisfaction a man can want."

Jolist, Ill., May 22.—Charles Angell will be released from the Illinois penitentiary on May 28. He entered in 1878 on a ten years' sentence for embezzling \$125,000 while secretary of the Pullman Palace Car company. He had been captured in Lisbon after traveling in many countries, and \$34,000 of this money was recovered. Angell's personal qualities made him has for items and some of his admirant, as he has had a number of offers of peaistions with prominent business houses in Chicege. He has acted in the capacity of an assistant to the keepers of the prison and is very popular in that institution,
